

Joeal Bijoy Thomas

Newark, DE — [✉ Email](#) — [🌐 LinkedIn](#) — [🐙 Github](#) — [📊 Portfolio](#)

Summary

Data Analyst & Business Analyst with expertise in SQL, Python, and Power BI, delivering end-to-end data pipelines, predictive modeling, and stakeholder-ready dashboards. Proven track record of driving 3–4× subscription growth, reducing CAC by 40%, and improving ROI by 20% through EDA, A/B testing, and ML optimization.

Education

University of Delaware M.S. in Data Science <i>Coursework: Regression Analysis, Applied Multivariate Statistics, Database Systems, Big Data Technologies, Algorithms</i>	<i>Newark, DE</i> <i>Aug. 2025 – Present</i>
Indira College of Engineering and Management B.E. in Computer Engineering <i>Coursework: Machine Learning, Deep Learning, Natural Language Processing, Database Management Systems, Probability & Statistics, Data Visualization</i>	<i>Pune, India</i> <i>Jun. 2020 – Jun. 2024</i>

Skills

Languages & Query	Python, SQL (Complex Queries, CTEs, Window Functions), R, JavaScript
Analytics, AI & ML	EDA, A/B Testing, Cohort Analysis, Regression, Time-Series Forecasting, Feature Engineering, Prompt Engineering, Data Cleaning & Wrangling, Statistical Analysis, Churn Modeling, NLP, LLMs, scikit-learn, TensorFlow, PyTorch
BI & Tools	Power BI, Tableau, Advanced Excel, Pandas, NumPy, ARIMA, Prophet, AWS (Fundamentals), N8N, Figma, Git
Methodologies	Agile/Scrum, Requirements Gathering, Stakeholder Management, ETL Pipelines, Process Improvement, KPI Reporting

Experience

University of Delaware <i>Teaching Assistant (AV Operations) — Newark, DE</i> Oversee 20+ technicians for university-wide events; manage daily operational reporting, client-facing stakeholder communications, and proactive pre-event logistics planning across cross-functional teams.	<i>Jan. 2026 – Present</i>
The Blue Fox Media <i>Data Analyst Intern — Pune, India</i> - Engineered complex SQL queries and performed data cleaning & transformation on large datasets, improving query performance by 40% and streamlining customer KPI reporting pipelines. - Conducted advanced EDA in Python (pandas, NumPy); built Power BI dashboards reducing reporting time by 25% and contributing to a 20% ROI increase; collaborated with stakeholders to translate findings into actionable business insights.	<i>Dec. 2024 – Jul. 2025</i>
Dentsu <i>Associate Business Analyst — Baner, India</i> - Gathered requirements and partnered with cross-functional stakeholders to build predictive audience models from Google Ads & AppsFlyer data, driving 3–4× subscription growth and reducing CAC by 30–40%. - Executed cohort-level A/B testing and iterative ML model optimization via Agile sprints; automated ETL workflows in JavaScript & Excel, cutting manual effort by 80% and improving targeting precision by 75%.	<i>May 2024 – Nov. 2024</i>
Cyber Secured India <i>UI/UX Design Intern — Online</i> Designed end-to-end UI/UX flows in Figma for cross-functional digital products; conducted usability analysis and iterated on designs based on stakeholder feedback, improving interface consistency and interaction smoothness.	<i>Feb. 2023 – Mar. 2023</i>
Indian Institute of Technology, Ropar <i>Research Intern — Online</i> Developed Python automation scripts for IoT sensor data processing and drone movement control; engineered task scheduling algorithms for an autonomous Crop Sprayer prototype; built 3D simulation models in Blender.	<i>Jun. 2022 – Aug. 2022</i>

Projects

Automated Report Workflow & LLM Chatbot Built an end-to-end ETL pipeline using n8n for automated reporting; integrated an LLM-powered chatbot for conversational querying and extraction of insights from unstructured data using generative AI.	<i>n8n, Python, LLM, GenAI</i>
Demand Forecasting for Supply Chain Optimization Developed time-series forecasting models achieving a 15% MAPE improvement; engineered features from seasonality/trend decomposition to optimize inventory decisions; visualized findings in Power BI.	<i>Python, Power BI, ARIMA, Prophet</i>
King County Housing Price Prediction Built a multiple linear regression model with log-transformations and backward elimination explaining 82% of price variance; validated via residual analysis, VIF checks, and data wrangling on 20k+ records.	<i>R, Statistical Modeling, Regression</i>
Indian Food Image Classification Achieved 94% classification accuracy using Google's ViT model; deployed as a standalone application with calorie recommendations.	<i>Python, Vision Transformer (ViT), Deep Learning</i>
